PROFILE

I am a self-driven and meticulous student. My effective time management skills and work ethic allow me to excel academically while balancing multiple projects. I thrive in challenging environments and enjoy solving complex problems. I actively seek hands-on experiences to enhance my technical knowledge. Eager to explore new technologies, I aim for personal and professional growth. I look forward to connecting with like-minded individuals and organizations that value innovation.

WORK EXPERIENCE

1. Electronic Info Website

I have created an electronic information website that serves as a resource for users interested in electronics. The website features articles, guides, and reviews on various electronic products and technologies. Its user-friendly design makes it easy for visitors to navigate and find the information they need. My goal is to provide accurate and helpful content to enhance the knowledge of electronics enthusiasts and beginners alike.

2. Sales Representative at PCELL

In my role as a sales representative at PCELL, I interact with customers to understand their needs and help them find the right electronic products. I provide detailed information about our products, answer questions, and assist with purchases. My focus is on building strong relationships with customers and ensuring they have a positive shopping experience. I also work with my team to meet sales targets and improve our service quality.

3. Working on a Java Mini Project

Currently, I am working on a mini project using Java, which helps me improve my programming skills. This project involves creating a simple application that solves a specific problem or fulfills a need. I am learning how to write efficient code, debug issues, and implement new features. Through this project, I aim to deepen my understanding of Java and software development practices while gaining hands-on experience.
